NGK ANNOUNCES OE SUCCESSES WITH FORD

NGK Spark Plugs, the leading spark plug manufacturer, has announced that its spark plugs are to be fitted as Original Equipment on the new Ford StreetKa, SportKa, Ford Focus RS and C-Max.

The NGK TR5B-13 spark plug is to be fitted as OE to the recently introduced 1.6 litre StreetKa and SportKa. This plug was selected because of the increasingly close cooperation between NGK and Ford in Germany.

NGK's PLTR6A-10G spark plug is to be fitted as OE to the Zetec ET/C engine fitted to the new 2 litre Ford Focus RS. This double platinum plug has been developed exclusively for this application and has been designed to achieve the highest possible ignition performance and service life.

The recently announced C-Max is powered by Ford's 1.8 litre I4 engine. NGK's new iridium ITR6F-13 spark plug has been developed specifically for this application.

NGK's spark plugs were first fitted as OE to Ford cars produced for the European market in 2000 on the 1.8 and 2 litre versions of the Mondeo.

The World's No.1 Spark Plug. Fact.
