NGK SPARK PLUGS AT EQUIP AUTO

NGK Spark Plugs, the leading spark plugs manufacturer, will be exhibiting at Equip Auto in Hall 6, Stand A41, where a major visitor attraction will be the Peugeot 307 WRC – sparked by NGK – currently competing in the 2005 World Rally Championship.

In Paris, NGK will be highlighting significant changes in the technology of spark plugs, an area where NGK prides itself on the success achieved by its engineering expertise. The Stand will also place major emphasis on glow plugs (pictured), another product area where new product offerings, recent OE successes and NGK's reputation for technical quality have resulted in NGK recently being able to announce that an independent market research study has confirmed it as clear UK market leader.

NGK is also the world's largest manufacturer of Lambda sensors under the NTK brand name, supplying these as Original Equipment to BMW, Volkswagen, Ford and many others. The NGK Stand will include product displays of Lambda sensors and other components which have put NGK at the forefront of emission controls.

The World's No.1 Spark Plug. Fact.
