NEW AFTERMARKET NGK GLOW PLUGS NOW AVAILABLE

NGK Spark Plugs (UK) Limited, the UK's leading spark and glow plug manufacturer, has announced that five new glow plugs are now available in stock to meet Aftermarket demand.

NGK's Y-541J glow plug is now available for fitment to various models of the Vauxhall Astra, Combo, Corsa and Meriva 1.7 litre engine.

Another high performance glow plug now available to the UK Aftermarket is NGK's Y-508J fitted as OE on the Kia Sorrento. Two new glow plugs - Y-529J and Y-721RS - are also now available for various Mazda applications.

A new ceramic glow plug - CZ71 - also now becomes available to the Aftermarket. This was fitted as OE on the Nissan Patrol and Terrano 3.0l.

NGK has just announced that it is continuing to extend its glow plug market leadership in the UK independent garage trade sector. New independent figures recently released now give NGK a market share of over 50% and growing.

The figures come from a recent report by GiPA UK Ltd, the market research company that focuses exclusively on the automotive Aftermarket. This detailed survey collected data on glow plug usage in workshops for all the leading glow plugs brands during 2005, looking at both franchised dealers and independent garages.
