## NEW NGK GLOW PLUGS NOW AVAILABLE TO THE UK AFTERMARKET

NGK Spark Plugs (UK) Limited, the UK's leading spark and glow plug manufacturer, has announced that five new glow plugs are now available in stock to meet Aftermarket demand.

NGK's YE05 is now available to the UK Aftermarket for PSA Peugeot Citroen smaller diesel engines. This glow plug is already fitted as OE on the PSA 1.4 and 1.6 litre HDI engines used in the new Peugeot 206, 207, 307 and 407, the Citroen Berlingo and C1, as well as the Ford Fiesta, Focus, Focus C-Max and Fusion - which use PSA supplied engines under the terms of the PSA-Ford diesel engine joint venture programme. The YE05 is also available for installation in the Toyota AYGO 1.4 HDI engine.

NGK's high performance YE06 0.8mm thread glow plug, which employs NGK's double coil SRM (Self-Regulating Metal) technology, is now available for 1.3 litre versions of the Fiat Panda, Punto 3 and Punto Grande as well as the Vauxhall Astra, Corsa, Tigra and Mervina. The YE06 is also fitted to the 1.3 litre Suzuki Swift.

NGK's Y-542J glow plug is now available for fitment to 1.4 litre versions of the Mini and Toyota Yaris.

Two other high performance glow plugs now available to the UK Aftermarket are the YE13 – for 1.5 litre versions of the Mitsubishi Colt and the Smart forfour - and the Y-939J for 1.9 litre versions of the Fiat Doblo and Punto.

NGK recently announced that it is continuing to extend its glow plug market leadership in the UK independent garage trade sector. Independent figures recently released now give NGK a UK glow plug market share of over 50% - and still growing.
